I really enjoyed the story and how you can choose what you want to do.

I would buy the 2nd game if there was such a thing.. You can finish a single play through of BlueberryNOVA in about half an hour so it is on the short side. Personally I prefer a VN that you can finish in 1 sitting.

The translation is on the poor side. I suspect English is the devs second language. At the end of the game they provide a method of contact if you desire to help them with their translation.

Over all BlueberryNOVA is a cute VN which I didnt mind spending my time on.. It was okay but, it clearly shows that this was written by a male. The characters felt stale and uninteresting as there's not much depth to them outside of "anime girl" and "lonely girl". Things also felt very rushed and needs to be fleshed out more. Only gave it a thumbs up as I don't think it was bad due to reading a lot worse.. Decent art, but the translation is poor. Really short story with two routes nothing really special take about not even 10mins each route. worst visual novel i've ever played. Unfortunately I can't recommend BlueberryNOVA.

Although there are some nice aspects, like the art style of the main characters or the fact that this VN is completely yuri themed and you don't have to bother with any male protagonists that disturb your reading experience.

The story overall feels rushed and not believable (so are the main characters).

There are too often background changes after only 2 or 3 (or even less) lines of dialogue, which seems somehow inharmonious. To make it even worse, the backgrounds are very inconsistent in their art style (some of them are drawings whilst others are photographs).

The game is very short. It took me an hour to take all routes and to complete all the achievements. Also there are only 5 (!) CGs unlockable in this game.

And unfortunately there are no trade cards yet.

The only way to improve this game (mostly story wise) would be to rebuild it from scratch.
